

# UNT Internships & Co-op Job Posting

## Texas Instruments

### Co-op

Job#: 47657

Majors: Accounting, Economics (Arts & Sciences), Finance, Logistics Supply Chain Mgmt, Mechanical Engineering Tech., Decision Sciences, Economics (Business)

### **Description:**

INTERVIEWS WILL BE ON CAMPUS ON OCTOBER 28.

\*Because this co-op is full-time, please take that into consideration and do not take a full course load.

Texas Instruments Incorporated provides innovative DSP and analog technologies to help our customers create the world's most advanced electronics. Our real-time signal processing technology permeates daily life in many different ways, from digital communications and entertainment to medical services, automotive systems and wide-ranging applications in between. The company's core business today is Semiconductor, accounting for 96 percent of our revenue, while our Education Technology business, representing 4 percent of our revenue, designs and develops calculator and technology solutions that help educators and students in their math and science learning.

Headquartered in Dallas, Texas, TI has manufacturing, design or sales operations in more than 25 countries. Everyone at TI works together to create an environment where people feel valued and are treated with respect, dignity and fairness. We are proud of our award-winning workplace, and have been named to the 100 Best Companies to Work For in America, 100 Best Companies for Working Mothers, Best Employers for Healthy Lifestyle, and Top 50 Companies for Diversity, among others.

At TI, you'll work with the best and the brightest on exciting, challenge-filled projects. From a flexible, informal and diverse work environment that cultivates high performance to outstanding benefits and profit sharing, TI provides great rewards for great work. And that's only the beginning.

TI has a dynamic co-op program for undergraduate students looking for exciting careers in finance or management accounting. The six-month program provides invaluable experience working in the fast-paced high-tech industry. Our co-ops go right to work! You will be a contributor, not a trainee, as you become familiar with the company's business systems and methods of operations. The co-op assignment will begin on July 20, 2009 – December 18, 2009 (there is some flexibility on the ending date of the assignment). Assignment locations: Dallas, Houston, or Sherman, Texas

Co-op positions are created and assigned according to immediate business needs. Take responsibility for real-life jobs such as:
